UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF NEW YORK

Case No. CV-0401945 (JBW)(SMG)

BARBARA SCHWAB, ET AL,
INDIVIDUALLY AND ON
BEHALF OF A CLASS OF ALL
OTHERS SIMILARLY
SITUATED,
Plaintiffs,

VS.

PHILIP MORRIS USA, INC.,)
ET AL,)
Defendants.)

DAY II PAGES 329-580

VIDEOTAPED DEPOSITION of

DOCTOR JOHN R. HAUSER, called as a witness by and on behalf of the Defendant, pursuant to the Federal Rules of Civil Procedure, before Teresa E. Costello, Registered Professional Reporter, Certified Shorthand Reporter No. 1452S98, and Notary Public within and for the Commonwealth of Massachusetts, at the offices of Goodwin Procter, 53 State Street, Boston, Massachusetts, on Friday, March 24, 2006, commencing at 10:06 a.m.

	30.	<u> </u>		
	Page 346		Page 3	348
1	A. I still find the question confusing, but let	1	MR. GALLAGHER: Same objection.	
2	me attempt to answer it. In the internet	2	A. The focus of the internet survey was to	
3	survey the in the conjoint analysis I did	3	determine consumers' trade-offs between	
4	not attempt to measure the reasons as to why	4	health risk, price, taste and other	
5	people started smoking in the first place.	5	dimensions. The internet conjoint analysis	
6	Q. In the conjoint analysis you made no effort	6	survey was not a study of smoking cessation.	
7	to determine whether anyone would not have	7	Q. Consequently you've made no effort to	
8	started smoking if he perceived that light	8	determine the percentage, if any, of light	
9	cigarettes were as unhealthy as regular	9	smokers who would have stopped smoking if	
10	cigarettes?	10	they believed that low tar cigarettes,	
11	MR. GALLAGHER: Objection to the	11	including lights, were as unhealthy as	
12	form.	12	regular cigarettes, correct?	
13	A. In the internet survey, the conjoint	13	A. That's not quite true.	
14	analysis survey, I did not attempt to	14	Q. What percentage of consumers, according to	
15	determine the causes that led consumers to	15	your internet survey, would have stopped	
16	start smoking, and therefore I did not	16	smoking if they perceived that light	
17	measure in the conjoint analysis internet	17	cigarettes were as unhealthy as regular	
18	survey whether or not starting smoking was	18	cigarettes?	
19	due to health risk.	19	A. Well, I haven't looked at all the data to	
20	Q. Okay. In the internet survey you made no	20	answer that particular question; however,	
21	effort to determine why consumers switched	21	the following I do know. That when we give	
22	from one brand to another during their	22	them statements such as change in health,	
23	smoking history, correct?	23	they have indicated that they would continue	
24	A. The purpose of the internet survey focused	24	to purchase the cigarettes, but at a	
25	on the brand they were now smoking and then	25	different price, for example, so this data,

2 3 4 5 6	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice.	1 2 3 4 5 6	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion	349
2 3 4 5 6 7	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not	1 2 3 4 5 6 7	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's	349
2 3 4 5 6 7 8	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers	1 2 3 4 5 6 7 8	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the	349
2 3 4 5 6 7 8	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes	1 2 3 4 5 6 7 8	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might	349
2 3 4 5 6 7 8 9	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that	1 2 3 4 5 6 7 8 9	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done	349
2 3 4 5 6 7 8 9 10	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question.	1 2 3 4 5 6 7 8 9 10	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an	349
2 3 4 5 6 7 8 9 10 11	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine	1 2 3 4 5 6 7 8 9 10 11	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation.	349
2 3 4 5 6 7 8 9 10 11 12 13	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have	1 2 3 4 5 6 7 8 9 10 11 12 13	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there	349
2 3 4 5 6 7 8 9 10 11 12 13 14	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low	1 2 3 4 5 6 7 8 9 10 11 12 13 14	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there was cigarettes that are unfiltered. There	349
2 3 4 5 6 7 8 9 10 11 12 13 14 15	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low tar cigarettes, including lights, were as	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there was cigarettes that are unfiltered. There are cigarettes, higher tar cigarettes,	349
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low tar cigarettes, including lights, were as unhealthy as regular cigarettes, correct?	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there was cigarettes that are unfiltered. There are cigarettes, higher tar cigarettes, full-flavored cigarettes with filters.	349
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low tar cigarettes, including lights, were as unhealthy as regular cigarettes, correct? MR. GALLAGHER: Objection to the	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there was cigarettes that are unfiltered. There are cigarettes, higher tar cigarettes, full-flavored cigarettes with filters. There are low tar cigarettes including light	349
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low tar cigarettes, including lights, were as unhealthy as regular cigarettes, correct? MR. GALLAGHER: Objection to the form.	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there was cigarettes that are unfiltered. There are cigarettes, higher tar cigarettes, full-flavored cigarettes with filters. There are low tar cigarettes including light cigarettes, and there are ultra light	349
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low tar cigarettes, including lights, were as unhealthy as regular cigarettes, correct? MR. GALLAGHER: Objection to the form. A. Could you rephrase that?	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there was cigarettes that are unfiltered. There are cigarettes, higher tar cigarettes, full-flavored cigarettes with filters. There are low tar cigarettes including light cigarettes, and there are ultra light cigarettes, correct?	349
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low tar cigarettes, including lights, were as unhealthy as regular cigarettes, correct? MR. GALLAGHER: Objection to the form. A. Could you rephrase that? Q. Ah-hah. You have made no effort to	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. I'm not providing an expert opinion on smoking cessation; however, it's possible, should I be asked to reanalyze the data with smoking cessation in mind, I might be able to form opinions, but I've not done that at this point, and I'm not providing an expert opinion on smoking cessation. Q. Indeed in the current marketplace there was cigarettes that are unfiltered. There are cigarettes, higher tar cigarettes, full-flavored cigarettes with filters. There are low tar cigarettes including light cigarettes, and there are ultra light cigarettes, correct? A. I'm you're making a statement as to the	349
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	trade-offs between health risk, monetary value, taste and other dimensions, and thus the respondents were conditioned upon already having chosen a brand. The internet survey was not focused on inter brand choice. Q. So you made no effort and you have not calculated the percentage of light smokers who would have switched to other cigarettes if they perceived let me rephrase that question. You have not looked to determine what percentage of light smokers would have stopped smoking if they perceived that low tar cigarettes, including lights, were as unhealthy as regular cigarettes, correct? MR. GALLAGHER: Objection to the form. A. Could you rephrase that? Q. Ah-hah. You have made no effort to determine what percentage of light cigarette	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	while not directly addressing that question, is certainly data that could inform the answer to that question, and so as a result, you know, it's a study that certainly could be done. 	589	<u>598</u>	
	Page 378		Page 380
1	A. Are you referring to interviews in this	1	they were able and willing to make
2	case?	2	trade-offs with respect to regular. We did
3	Q. Yes.	3	not do any quantitative analysis of pre-test
4	A. Okay, you're referring to interviews in this	4	interviews nor did we do a quantitative
5	case. I debriefed I was debriefed by Mr.	5	analysis of qualitative interviews as is
6	Gaskin and Miss Schusshein on the interviews	6	appropriate survey methodology; therefore,
7	that they conducted; however, I did not	7	since I did not record the number of people
8	conduct any additional interviews beyond the	8	who told me that or described cigarettes as
9	interviews that they conducted at my	9	regular whether they be filtered or
10	direction.	10	unfiltered or whatever, that was not
11	Q. So to the best of your knowledge let me	11	recorded; therefore, I cannot, sitting here
12	go back. No consumer has ever told you,	12	today, give you the exact number of people.
13	personally, that he views a filter tip	13	Q. Let me represent to you that at his
14	cigarette as a regular cigarette, is that	14	deposition two weeks ago Doctor Jeffrey
15	correct?	15	Harris said that he found the word, regular,
16	MR. GALLAGHER: Objection to the	16	as used in this survey to be ambiguous. Now
17	form.	17	I'm going to ask you questions with regard
18	A. I can't answer that. I've spoken to many	18	to specific ads. Let me hand you what's
19	consumers in many instances totally outside	19	been marked for identification purposes
20	this case. I do not recall whether they	20	as
21	referred to cigarettes as regular cigarettes	21	MR. GALLAGHER: Hold on. What was
22	or not. It's certainly the word that I'm	22	the point of that? Are you going to ask him
23	used to hearing, so I form that belief	23	a question about what Doctor Harris said
24	sometime; however, I'm not giving an expert	24	about these ads?
25	opinion on that.	25	MR. GROSSMAN: Yes, about what
	Page 379		Page 381
1	The pre-test interviews in this	1	Doctor Harris said and the ads.
2	case were done or qualitative interviews	2	MR. GALLAGHER: Gratuitous.
3	done in this case were done by my team.	3	MR. GROSSMAN: No. Both are
4	Q. Now did Mr. Gaskin or Miss Schusshein tell	4	identical.
5	you how many people being interviewed	5	MR. GALLAGHER: Do you have
6	referred to filter tip cigarettes as	6	a copy of the transcript to show him what
7	regular?	7	Doctor Harris actually said since that is
8	A. Miss Schusshein and Mr. Gaskin told me that	8	available?
9	based upon the qualitative interviews and	9	MR. GROSSMAN: I think we do. I
10	their experience and experiential	10	think we do have a copy of it.
11	interviews, they told me that the questions	11	MR. GALLAGHER: He shouldn't have
12	as we ultimately worded them, were well	12	to rely on your representation of what
13	understood by consumers, and they can make	13	Doctor Harris said.
14	the appropriate trade-offs.	14	MR. GROSSMAN: We're not going to
15	MR. GROSSMAN: Move to strike as	15	take time to do it now but
16	non-responsive.	16	MR. GALLAGHER: If you can make
17	Q. Doctor Hauser, did Miss Schusshein or	17	that available, that's the fairest thing to
18	Mr. Gaskin specifically tell you the number	18	the witness because I think you're
19	of respondents, the number of people who	19	mischaracterizing Doctor Harris' testimony.
20	they interviewed who understood the word,	20	MR. GROSSMAN: Let me hand you
21	regular cigarette, to mean filter tip	21	this. We're not going to take time out to
22	cigarette?	22	do it right now, but I'll show you the
23	MR. GALLAGHER: Objection to the	23	portion.
24	form.	24	MR. GALLAGHER: Well, I don't think
25	A. Consumers understood the word, regular, and	25	he has to answer a question until he's seen

	Page 382		Page 384
1	it.	1	Q. Part of an M?
2		2	A. Part of an M.
3	MR. GROSSMAN: Well, I'm going to	3	MR. GALLAGHER: I have one more
	ask him another question.		
4	Q. Doctor Hauser, let me show you what's been	4	question. Are you representing the date
5	marked for identification purposes as	5	written on here is the date when this ad
6	Exhibit 15. It's an ad for Camel	6	ran?
7	cigarettes?	7	MR. GROSSMAN: It's my
8	MR. GALLAGHER: Can you read that	8	understanding that that is the date when the
9	copy, Doctor Hauser?	9	ad ran. This is from 1967.
10	A. This is an ad with a little bit hard to	10	MR. GALLAGHER: 1967 prior to the
11	see it looks like P period I can't.	11	introduction of light cigarettes.
12	There's some pencil up here. It looks to be	12	MR. GROSSMAN: That's correct.
13	a date of 6/1/67?	13	Q. Have you ever seen this ad before,
14	Q. Yes. This is an advertisement from 1967 for	14	Doctor Hauser?
15	Camel cigarettes.	15	A. I've seen many, many ads throughout my life.
16	A. And there's another date that appears to be	16	This ad if I accept your representation
17	4/18/67. What do those mean?	17	as 1967 which is almost 40 years ago, I do
18	MR. GALLAGHER: My copy is cut off.	18	not recall whether or not I've seen this ad
19	I don't even have the full advertisement.	19	40 years ago.
20	Q. Do you see under the that there are two	20	Q. Let me hand you what I've had marked for
21	packages of Camels in this ad?	21	identification purposes as Hauser
22		22	Exhibit 16. That's a Chesterfield ad. This
23	MR. GALLAGHER: Doctor Harris, let	23	
	me see your version. This is not a complete	24	also is quite old. I don't know the date,
24	copy. It is cut off.		but I believe it's from the 1960's.
25	MR. GROSSMAN: Your objection is	25	A. Okay, so you believe that this ad is from
	Page 383		Page 385
1	noted.	1	the 1960's, and I should accept that as a
2	MR. GALLAGHER: A significant	2	
3	number of words on the right-hand side. It		predicate?
			predicate?
- 4		3	Q. Yes.
4 5	is unclear what the full ad says. Go ahead.	3 4	Q. Yes.A. So should I write that on there?
5	is unclear what the full ad says. Go ahead. MR. GROSSMAN: Your objection is	3 4 5	Q. Yes.A. So should I write that on there?Q. No, don't write that down there.
5 6	is unclear what the full ad says. Go ahead. MR. GROSSMAN: Your objection is noted.	3 4 5 6	Q. Yes.A. So should I write that on there?Q. No, don't write that down there.A. So I can write that down on my yellow sheet

3	purposes as Hauser Number 19. This is a	3	A. Upper right-hand corner of page six.
4	store coupon from 1981. If you look on the	4	Q. Page six in the upper right-hand corner?
5	second page it says, "Coupon expiration	5	A. It's blank.
6	date, December 31, 1981." Do you see that?	6	MR. GALLAGHER: No, it's
7	A. I see this. I'm sorry. Where is the date	7	A. You mean the text?
8	on this?	8	Q. Do you see where it says page six up here?
9	Q. Second page?	9	No, go further. The first eleven pages are
10	A. Second page. December 31st, 1981.	10	numbered at the bottom, and then there are
11	Q. You see this is a coupon to save \$1 on a	11	pages
12	carton of Camel Lights, Camel Filters or	12	A. Pages numbered at the top, okay. Okay, I
13	Camel Regulars?	13	have it.
14	A. I see where it says that, yes.	14	Q. Could you look with me at the Camel
15	Q. It's your understanding, is it not, that	15	cigarettes listed?
16	Camel regular is the unfiltered product?	16	A. Yes.
17	MR. GALLAGHER: Objection to the	17	Q. You see there are described a number of five
18	form.	18	cigarettes that are 100's and then it has F?
19	A. You're asking me to make an opinion here? I	19	Some are listed as light or menthol or ultra
20	have not studied these nor have I talked to	20	light. Do you see that?
21	how consumers would interpret those.	21	A. I see basically a printout of a table here,
22	Q. Okay, I'd like to direct your attention	22	yes, and what was your question?
23	A. This particular ad. I'm not saying how	23	Q. Do you see that some of the Camels are
24	consumers would interpret this particular	24	listed as 100's?
25	ad.	25	A. I see that in the second column of this
	Page 391		Page 393
1	Q. You've not studied how consumers interpret	1	table, Camels, there are one, two, three,
2	any cigarette ad, is that correct?	2	four, five of them listed as 100.
3	A. I have not done a systematic survey, study	3	Q. Do you see that there are then a number
4	of cigarette advertising.	4	listed as king?
5	Q. What's the number of this? I'd like to	5	A. There are a number listed as king. I agree
6	direct your attention, if I may, to	6	with that.
7	Exhibit Number 6.	7	Q. Do you see there's then one listed as
8	MR. GALLAGHER: Are you done with	8	regular?
9	the done with advertisements?	9	A. Well, there's one listed in this taxonomy
10	MR. GROSSMAN: No, it's all going	10	with the terms, Reg.
11	to be together.	11	Q. Yes. That's the Camel non filtered?
12	MR. GALLAGHER: I want to keep them	12	A. Is that what NF means?
13	out.	13	Q. Yes, it is.
14	Q. Could you please look at Exhibit Number 6?	14	A. I will accept your representation that NF
15	A. Which one is that?	15	means non filtered.
16	Q. That is the FTC Tar, Nicotine and Carbon	16	Q. Could you look with me at page
17	Monoxide report issued in the year 2000.	17	A. However, there are well, go ahead.
18	A. Exhibit 5 or Exhibit 6?	18	Q. Page 16.
19	Q. Let me see and I'll tell you. Exhibit 5.	19	A. Also at the top?
20	Yes, this was the one we substituted in.	20	Q. At the top. Toward the middle of the page
21	Look at Exhibit 6.	21	do you see the Lucky Strikes?
22	A. Look at Exhibit 6?	22	A. I see Lucky Strike.
23	Q. Yes.	23	Q. Do you see the first one is regular, listed
24	A. Thank you.	24	as regular non filtered?
25	Q. Doctor Hauser, I'd like to direct your	25	A. I again see a table on page 16 here. I see

17 (Pages 390 to 393)

	301	601	
	Page 394		Page 396
1	Lucky Strike in the first column. I see Reg	1	first.
2	in the second column.	2	Q. Have you ever asked any consumer what he or
3	Q. And beyond that there are Lucky Strikes	3	she understands by the term, Camel regular?
4	listed as king, and those have filters?	4	A. As part of this litigation I have not asked
5	A. I see the three other listed as Lucky	5	any consumer what he or she means by
6	Strike. They appear to have asterisks after	6	which was it again?
7	them. I do not know what the asterisks	7	Q. Camel regular?
8	mean. In the second column there's the	8	
		9	A. Camel regular, however, as you know there
9	word, king, and in the third column there is		were qualitative interviews and pre-tests
10	the letter, F.	10	that were done by my team upon which I've
11	Q. One more. Could you look with me at	11	been briefed.
12	page 21 in the upper right-hand corner?	12	Q. If consumers understand regular to refer to
13	A. Oh, I'm on the page. Sorry.	13	an unfiltered cigarette, as a
14	Q. Do you see almost at the bottom there's	14	hypothetical
15	there are a number of cigarettes called	15	A. Okay, one more. Let me write it down. So
16	Pall Mall?	16	now we have assume consumers regular equals
17	A. Yes, in the first column there are one, two,	17	what?
18	three, four, five, six, seven Pall Mall.	18	Q. Regular equals short, unfiltered cigarette.
19	Two of these have asterisks. I still do not	19	A. Short. That's pure hypothetical because
20	know what the asterisks mean.	20	that's not the case, but go ahead.
21	Q. The last one says, regular non filtered? Do	21	Q. Doctor, if consumers understand as a
22	you see that?	22	predicate question your survey, in more
23	A. The last one in this taxonomy has Reg in the	23	than one place, asks consumers to compare
24	second column and has NF in the third	24	the risks of what are referred to as light
25	column.	25	cigarettes and what are referred to as
	Page 395		Page 397

	Page 414		Page	416
1	health risks was second most important for	1	between the maximum partworth for that	
2	an additional approximately 58 percent, so	2	feature and the minimal partworth for that	
3	the 58 plus the 18 is now getting into the,	3	feature. Having now made that definition so	
4	you know, large majority of consumers for	4	I can be perfectly clear, I am quite happy	
5	which health risk is ranked either first or	5	to say that not happy to say that's	
6	second.	6	not happy. I am accurately reporting that	
7	Q. For the typical consumer of light	7	18.4 percent of these consumers find health	
8	cigarettes, health risks are the most	8	risk to be the most important; therefore,	
9	important factor let me I'll start the	9	100 minus 18.4 which is 81.6 percent of the	
10	question again. For the typical purchaser	10	consumers find one of the other four	
11	of light cigarettes, health risks are not	11	features to be more important than health	
12	the most important factor in choosing their	12	risks.	
13	brand and type of cigarette.	13	Q. Doctor, in your survey before asking	
14	A. Again, defining importance as the difference	14	consumers to make choices upon which	
15	between the maximum partworth for that	15	partworths were measured, you asked	
16	feature and the minimum partworths for that	16	consumers on a numerical scale to compare	
17	feature. Again, just so we're making sure	17	the risks of light cigarettes with what you	
18	of the technical definition here, then for	18	referred to as regular cigarettes, is that	
19	18.4 percent of the respondents, health risk	19	correct?	
20	is the most important. It's the second most	20	A. Okay, let's yes, there was a numerical	
21	important for approximately 58 percent and a	21	scale, but so that we can facilitate the	
22	third of four for approximately 22 percent	22	questioning, let's get to that exact	
23	so, you know, I'm answering the question	23	numerical scale in the survey. Okay, we're	
24	because I want to be as technically accurate	24	talking about health risks?	
25	as possible to avoid any misinterpretation	25	Q. Yes.	
	Page 415		Page	417
1	of the numbers.	1	A. Yes. So this is page E19 of Exhibit 7.	
2	Q. You've given opinions in other class actions	2	Q. You asked respondents to rate what they	
3	about predominance and typicality, correct?	3	perceive to be the health risks of light	
4	A. Predominance and typicality, I understand,	4	cigarettes compared to regular cigarettes on	
5	are legal terms. I'm not providing a legal	5	a scale of zero to 150 and one to 150 where	
6	opinion here. I am testifying as to the	6	100 equals the risk of a regular cigarette,	
7	veracity of the the reliability and	7	is that correct?	
8	validity of the survey and I'm also	8	A. That's let me just make that technically	
9	testifying to what the results of those mean	9	correct. It's a scale of zero to the top	
10	in terms of percentage of consumers who have	10	point is 150 plus, and the respondents then	
11	certain opinions. I leave it to counsel to	11	can enter a number between zero and	
12	turn this into a legal filing.	12	essentially anything they want, the high	
13	Q. Given four factors and only four to consider	13	end. I do not recall whether anybody	
14	as to the choice of cigarettes, those	14	entered higher than 150, but yes, we did use	
15	factors being box or pack, health risks,	15	this scale.	
16	price and perceived taste, the overwhelming	16	Q. And your tabulation of the responses shows	
17	majority did not choose perceived health	17	that approximately 40 percent of all	
18	risks as the most important factor in their	18	respondents valued light cigarettes on that	
19	choice, correct?	19	scale as being 100 or higher, is that	
20	MR. GALLAGHER: Objection. Asked	20	correct?	
21	and answered.	21	MR. GALLAGHER: Objection to the	
22	A. Again, just so we have a technical statement	22	form.	
23	here and I really want to make clear this so	23	A. Well, it depends what you mean by	
24	I can answer the question as accurately as	24	approximately 40 percent, but the actual	
25	possible. Here importance is the difference	25	numbers can be calculated. On this scale I	

23 (Pages 414 to 417)

	580	503	
	Page 418		Page 420
1	believe it was about 38 percent, maybe a	1	than the health risks of regular cigarettes
2	little bit less, indicated 100, and then	2	at the time of the survey which is again
3	there was a much smaller percentage that	3	spring of 2005.
4	indicated a number higher than 100, and this	4	I do not know prior to the from
5	was their perceptions at the time of the	5	the conjoint analysis I do not know whether
6	survey which was in the spring of 2005.	6	they held different beliefs prior to that
7	Q. Doctor, just for clarity, over 38 percent of	7	survey.
8	all of the respondents value the health	8	Q. Fine, but more than 38 percent viewed light
9	risks	9	cigarettes at the time of the survey as
10	A. Well, let's say over 37. That's what I do	10	being as dangerous or more dangerous than
11	remember.	11	so-called regular cigarettes, correct?
12	Q. Over 37 percent of all the respondents wrote	12	A. As I've indicated, slightly over 60 percent
13	the number 100. Isn't that correct? It's	13	which is 100 minus 38 or whatever, you can
14	37.16 percent wrote the number 100, isn't	14	do the arithmetic just as well as we can,
15	that correct?	15	perceived light cigarettes as being less
16 17	A. I really wish you would use positives in the questions; it would be so much easier.	16 17	unhealthy than regular cigarettes and, of course, the complement of that, 100 minus
18	<u>*</u> '	18	
19	Would be done quicker. Q. I'll rephrase the question. Over 37 percent	19	that number would perceive the opposite at
20		20	the time of the survey.
21	of the respondents to your survey wrote the	21	MR. GROSSMAN: Okay, we have to
22	number 100 in the comparison of the risks of	22	change the tape. Why don't we take a
23	light cigarettes and so-called regular	23	five-minute break? While you're changing
24	cigarettes, correct? A. It is correct that at the time of the	24	the tape, I want to stay on the written
25		25	record for one moment. Paul, the data that
25	survey, which was spring, 2005, and again	25	you
	Page 419		Page 421
1	I'm trying to remember the exact number. I	1	MR. GALLAGHER: Ted, I really need
2	don't have it in front of me, but it is the	2	to use the restroom.
3	ball park of 37 percent of the respondents	3	MR. GROSSMAN: Okay.
4	answered wrote down 100 in this box.	4	(Brief Recess.)
5	Q. And another group comprising something over	5	Q. Doctor Hauser, when we took the break you
6	one percent of the respondents, wrote	6	had discussed a number of people who had
7	numbers over 100, correct?	7	valued in your survey the health risks of
8	MR. GALLAGHER: Objection to the	8	light cigarettes as being equal to or
9	form.	9	greater than the health risks of so-called
10	A. At the time of the survey, which was spring	10	regular cigarettes.
11	of 2005, there were a small percentage of	11	Notwithstanding that, under your
12	respondents, I do not recall whether it was	12	partworth analysis, you conclude that over
13	slightly over or slightly under one percent,	13	90 percent of light cigarette smokers
14	wrote a number higher than 100 in this box.	14	suffered economic damage because they valued
15	Q. So when asked directly, something over	15	health risks of light cigarettes as higher
16	38 percent of all the respondents viewed	16	than the perceived let me I will start
17	light cigarettes as being as dangerous or	17	that over.
18	more dangerous than so-called regular	18	Doctor, inasmuch as you found in
19	-i	19	answers to direct question that more than
	cigarettes, correct?		
20	A. Well, what we're saying is that	20	38 percent of all respondents valued the
20 21	A. Well, what we're saying is that approximately 60 percent, a little bit	21	health risks of light cigarettes as being
20 21 22	A. Well, what we're saying is that approximately 60 percent, a little bit under, a little bit more a little bit	21 22	
20 21 22 23	A. Well, what we're saying is that approximately 60 percent, a little bit under, a little bit more a little bit more than 60 percent a little bit more	21 22 23	health risks of light cigarettes as being equal to or greater than the health risks of regular cigarettes, your calculation of
20 21 22	A. Well, what we're saying is that approximately 60 percent, a little bit under, a little bit more a little bit	21 22	health risks of light cigarettes as being equal to or greater than the health risks of

24 (Pages 418 to 421)

	580	504		
	Page 422		Page ·	424
1	Isn't that right?	1	A. Third line on page 22.	
2	MR. GALLAGHER: Objection to the	2	Q. "For 90.1 percent of the 627 respondents,	
3	form.	3	this difference was positive, indicating	
4	A. I'm providing an expert opinion with respect	4	that, given the choices made by respondents	
5	to the survey and the responses of the	5	who answered the survey, the best estimate	
6	survey. I have not yet been asked to	6	of their importance for health risks is	
7	provide any economic assessment of the	7	positive." Correct?	
8	damages.	8	A. That's what this report says and that's my	
9	Q. Well, for that person who did, Doctor	9	opinion.	
10	Harris, Doctor Harris was not provided with	10	Q. Your opinion is that approximately	
11	the responses of the survey participants to	11	90 percent of light smokers view health	
12	the question that asked them to value the	12	risks let me rephrase that question.	
13	health risks of light cigarettes against the	13	It's your opinion that approximately	
14	health risks of regular cigarettes on a zero	14	90.1 percent of smokers of light cigarettes,	
15	to 150 plus scale, isn't that correct?	15	if given a choice between two identical	
16	A. I am unaware of all of the documents that	16	cigarettes, except for health risks, would	
17	Doctor Harris was or was not provided.	17	prefer the cigarette that was safer,	
18	Q. Who made the decision as to which documents	18	correct?	
19	Doctor Harris would be provided with?	19	A. What this says is that for my best	
20	A. Are you asking me to speculate?	20	estimate is that 90.1 percent of the	
21	Q. I'm asking you if you know.	21	respondents, if given the choice between two	
22	MR. GALLAGHER: Don't speculate.	22	otherwise totally identical cigarettes, one	
23	If you know, Doctor.	23	of which had less health risk and the other	
24	Q. I'm asking you if you know who made that	24	of which had more health risk, then they	
25	decision?	25	would value that choice and choose the one	
	Page 423		Page ·	425
1	A. I do not know what documents Doctor Harris	1	with less health risk.	
2	requested, nor do I know what documents he's	2	Now there's the other ten percent.	
3	been provided.	3	I can't recall which of those would go the	
4	Q. Who transmitted the documents to Doctor	4	other way or which of those just would be	
5	Harris to the best of your knowledge?	5	indifferent.	
6	MR. GALLAGHER: Objection to the	6	Q. Why would anyone presented with two	
7	form.	7	otherwise identical cigarettes not prefer	
8	A. Which documents are you referring to?	8	the safer cigarette?	
9	Q. Any documents relating to your partworth	9	MR. GALLAGHER: Objection to the	
10	study to your questionnaire.	10	form.	
11	MR. GALLAGHER: Objection to the	11	A. Well, there were a few people in here	
12	form.	12	it's a very small number which might be	
13	A. I do not know who transmitted the	13	considered error and we indicated there's	
14	information to Harris with respect to the	14	always going to be a few of those within any	
15	conjoint analysis study other than what he	15	survey, and that's why we have to deal with	
16	asked me directly, so I don't want to	16	the vast majority of these, and it might	
17	speculate as to who would have provided that	17	also be that there are other reasons that I	
18	information.	18	would just have to speculate upon, but with	
19	Q. Now in your opinion you say that for 90.1 of	19	the quantitative number per se is that we	
20	the page 22.	20	came up with a very, very small number who	
21	A. Exhibit?	21	appeared to be placing positive or negative	
22	Q. Exhibit Number 1, page 22.	22	value on health risk, very small number	
23	A. Page 22.	23	which could be within surveyor.	
24	Q. You say in the beginning of the end of the	24	Q. In so doing those people were not comparing	
25	third line	25	the perception of health risks of light	I

25 (Pages 422 to 425)

	581	<u>605</u>	
	Page 426		Page 428
1	cigarettes as they're marketed and regular	1	saying. Might be taste, might be price,
2	cigarettes so-called as they're marketed	2	might be pack size, but basically 90 percent
3	which was asked in a different question on	3	of the people have positive value,
4	your questionnaire, but rather were	4	significant positive well, I'm sorry, in
5	evaluating whether they gave any value to	5	this case it's just positive value. They
6	health risks at all, is that correct?	6	have positive value on health.
7	MR. GALLAGHER: Objection to the	7	Q. And that positive value is not the positive
8	form.	8	value that they perceived to be the
9	A. Well, you put in a predicate there that	9	difference between the cigarettes that they
10	wasn't quite technically accurate. Now if	10	actually smoke and regular cigarettes as
11	you can re-ask the question either without	11	marketed in the marketplace, is that
12	that predicate or	12	correct?
13	Q. Which predicate are you preferring to?	13	MR. GALLAGHER: Objection to the
14	A. Well, the predicate that says as marketed,	14	form.
15	and that just didn't feel right, and I found	15	A. That's not correct.
16	the question a little bit confusing in the	16	Q. Okay. Let me rephrase the question.
17	way you asked it, so I want to be very	17	Included within that 90 percent are people
18	careful when I answer the question that I	18	who, in fact, view light cigarettes to be at
19	want to answer a well-phrased question that	19	least as dangerous as regular cigarettes.
20	I understand.	20	MR. GALLAGHER: Objection to the
21	Q. In your questionnaire you asked respondents	21	form.
22	to compare hypothetical cigarettes, not	22	A. Respondents in the survey answered that they
23	cigarettes that are actually marketed,	23	perceived, at the time of the survey, and
24	correct?	24	we've gone over these percentages before,
25	MR. GALLAGHER: Objection to the	25	but a certain number of these people and we
	Page 427		Page 429
1	form.	1	can go back and take a look at those
2	A. The conjoint analysis task describes	2	percentages, if need be, at the time of the
3	cigarettes as profiles. Some of these are	3	survey perceived that the health risks of
4	hypothetical cigarettes. Some of those that	4	light cigarettes are the same as to health
5	responded may recognize as their existing	5	risks of regular cigarettes, and so some of
6	brand, but we are predicated upon the	6	those people would be included within the
7	cigarette they're smoking, and then we do	7	90 percent who, when faced with a choice of
8	vary these four characteristics as I've	8	a cigarette that was, say, less unhealthy,
9	testified at great length yesterday and	9	would, in fact, be willing to choose not
10	today.	10	only choose the less unhealthy cigarette,
11	Q. And in that regard you even for people	11	but they would be willing to give up other
12	who viewed light cigarettes as being just as	12	aspects, compensatory attribute to get that
13	risky as so-called regular cigarettes, even	13	better health risk as they perceive it.
14	such people might prefer a healthier	14	Q. Doctor, we've gone over the four factors
15	cigarette if they didn't have to give up	15	that were measured. One of the factors that
16	anything in taste or price or package, is	16	was not measured one factor that was not
17	that correct?	17	measured was brand, correct?
18	MR. GALLAGHER: Objection to the	18	A. We've gone over this again and again and
19	form.	19	again.
20	A. Well, I think what we're finding is that for	20	Q. That's it.
21	approximately 90 percent of the people, if	21	A. And as I've indicated, consumers were to
22	they could get better health or less health	22	consider the brand they were currently using
23	risk, if they could get less health risks	23	and light cigarette they were currently
24	then they would be willing to give up some	24	smoking.
25	things to get that, and that's what we're	25	Q. There is no where in your study where you

26 (Pages 426 to 429)

	580	<u> 306</u>		
	Page 446		Page	448
1	it was asked, so I cannot make an opinion on	1	survey with respect to smoking cessation	
2	whether the question was asked correctly,	2	other than as we've so testified. You've	
3	whether it was two-sided or any other	3	now shown me a Gallup poll which I have not	
4	appropriate things, so as a result I cannot	4	had a chance to study the methodology on.	
5	provide an opinion with respect to this	5	You have also shown me some data from	
6	question.	6	Greenfield also which I have not had the	
7	MR. GROSSMAN: Mark this as 21.	7	chance to study methodology on, so these two	
8	(Poll Releases marked	8	may or may not be consistent, and I have no	
9	Exhibit Number 21.)	9	opinion on that until I have a chance to	
10	Q. Doctor Hauser	10	study this and I also, which I think is the	
11	MR. GALLAGHER: Let's make this the	11	final part of your question, I have not	
12	last exhibit before lunch, please.	12	provided an expert opinion with regard to	
13	Q. Doctor Hauser, I hand you what's marked for	13	smoking cessation in this case, and I have	
14	purposes of identification Hauser Exhibit 21	14	not undertaken any studies with respect to	
15	which is a release of the Gallup Poll,	15	smoking cessation that I can recall.	
16	November 18, 1999, and I would like to	16	Q. And you're not offering any opinion with	
17	direct your attention, if I may, to the	17	regard to the number of smokers of light	
18	third page where Gallup gives historic	18	cigarettes who continued to smoke in	
19	results on the question, "All things	19	reliance on the health characteristics of	
20	considered, would you like to give up	20	low tar cigarettes, correct?	
21	smoking or not?"	21	A. I'm sorry. I really must apologize here. I	
22	MR. GALLAGHER: Have you had an	22	just wanted to take a quick look at these	
23	opportunity to take a look at the document,	23	documents that you put in front of me, so	
24	Doctor Hauser?	24	I go ahead.	
25	THE WITNESS: No, I have not and I	25	MR. GALLAGHER: Listen to his	4.40
	Page 447		Page	449
1	don't know if I'm going to be able to do	1	question.	
2	this before one o'clock.	2	A. Listen to your question so if you could	
3	MR. GALLAGHER: Well, go ahead and	3	please re-ask it.	
4	ask your question.	4	Q. You're offering no opinion	
5	Q. Okay, I'll ask the question. We'll see.	5	A. And	
6	Have you made any study of public polling to	6	Q. I'll start it again. You were offering no	
7	determine the extent to which smokers	7	opinion as to the number of smokers of light	
8 9	indicate an interest in stopping smoking?	8	cigarettes who continued to smoke in	
10	MR. GALLAGHER: Again, I object to the form.	10	reliance on the health characteristics of	
11	A. I have indicated many times I am not	11	low tar or other light cigarettes, correct? MR. GALLAGHER: Objection to the	
12	providing an expert opinion in this case	12	form to the extent that it calls for a legal	
13	with respect to smoking cessation.	13	conclusion. Go ahead, Doctor Hauser.	
14	Q. Beyond that have you made any effort to	14	A. I have not completed a study in this case	
15	compare the results of your questionnaire	15	nor have I begun a study in this case of	
16	with any public poll that has ever been	16	smoking cessation.	
17	conducted and published to determine whether	17	Q. And your conjoint analysis does not purport	
18	your responses to the questionnaire are	18	to measure out-of-pocket expenses or	
19	within the same range as those determined by	19	out-of-pocket damages that may have been	
20	public polls that were commissioned for	20	suffered by light cigarette smokers, is that	
21	purposes other than litigation?	21	correct?	
22	MR. GALLAGHER: Objection to the	22	MR. GALLAGHER: Objection to the	
23	form.	23	form. Again, legal conclusions. Go ahead,	
24	A. Well, let me first say that as you have	24	Doctor Hauser.	
25	indicated there are no questions on my	25	A. As I've indicated, I am testifying as an	

31 (Pages 446 to 449)

	580	<u>607</u>	
	Page 454		Page 456
1	Stanford, whether it was students or whether	1	digitiling, which we defined yesterday and
2	it was faculty members, and as far as I can	2	based upon that they were then going to
3	tell they do not provide explicit reference	3	provide their samplests with web TV as a
4	to the study, and the contact person is the	4	means of answering internet panels.
5	vice president of marketing communications	5	Now I do know from the people that
6	at Knowledge Networks.	6	I once knew at Knowledge Networks they just
7	Q. If you look on the last page they say the	7	weren't able to make that work, and they
8	source of their information in the box is	8	started losing a lot of business because
9	"Comparing the results of probability and	9	basically the market research industry was
10	non-probability sample surveys presented at	10	not convinced of the adequacy of the
11	the 2005 AAPOR conference."	11	Knowledge Networks panel.
12	A. So in other words what they're referencing	12	Now I have not tracked Knowledge
13	is a verbal presentation which we have no	13	Network since then, so I do not know if
14	way of verifying, and they do not indicate	14	Knowledge Networks has, in fact, recovered
15	either who made that presentation or whether	15	from the trouble that they were in at that
16	or not a Knowledge Networks person was a	16	time, and that was back in oh, I think it
17	coauthor of that presentation, and curiously	17	was about 2001, 2002 when they had a major
18	they do not indicate any of the marketing	18	defection of the head of basically the
19	faculty at Stanford having been involved.	19	chief scientist and the head of R and D
20	Q. Prior to your engagement of Greenfield	20	defected from Knowledge Networks because
21	Online to compile the panel that was used in	21	they were uncomfortable with this, and I do
22	this case, did you make did you undertake	22	not know whether or not this is in response
23	any research to compare the validity of the	23	to some of the problems that Knowledge
24	samples aggregated by Greenfield with the	24	Networks was having.
25	validity of samples aggregated by Knowledge	25	Q. I'm not asking for a testimonial on behalf
	Page 455		Page 457
1		1	
1	Networks, GoZing, Harris Online, SSI or	1	of Knowledge Networks. I'm just asking
2	Survey Direct?	2	whether some internet-based companies
3	A. Would you please clarify what you mean by	3	internet research providers obtained their
4	aggregated?	4	panels based upon sampling and others
5 6	Q. Greenfield presented you with a panel among	5	obtained their panels based upon volunteers?
7	whom your survey was taken. Is that	6 7	A. What I do know is that prior to
	correct? A. Greenfield presented us with a potential set		approximately 2001 Knowledge Networks had a
8	*	8 9	plan to obtain their sample their internet sample from random digit dialing.
10	of respondents from whom we sampled with	10	I do not know if that continues today. This
11	stratification to 72 different categories. Now I note that there's absolutely nothing	11	sort of seems this document, which is a
12	in this document that you've given to me	12	press release, seems to imply that they
13	that deals at all with stratification or	13	continue that today, so I do not know if
14	with the fact that such stratification will,	14	Knowledge Networks has been able has
15	in fact, enhance to the representativeness	15	found a way in which to make that work.
16	of the survey, so what you've presented me	16	Q. Okay. Greenfield Online obtains its panels
17		17	through volunteers, is that correct?
18	with is an analysis of alternative methodologies on the raw sample without	18	
19	these various stratifications.	19	A. Greenfield Online is primarily an opt in panel as has been appropriate in terms of
20	Q. Some Online service providers develop their	20	the change in basically the way surveys are
21	panels through sampling and others through	21	done over the last five or six years with
22	volunteering, correct?	22	the basically opt in being one of the
23	A. Well, what I do know is that originally	23	best way to get panels.
24	Knowledge Networks had an attempt that they	24	Q. Every person who participated in your survey
25	were going to use RDD sampling, random	25	online had volunteered to participate in
ر ک	were going to use KDD sampling, fandom	ر کے ا	omnie nau voiumeereu to participate III

1	Greenfield Online surveys, is that correct?	1	reviewed it online which describes just a
2	A. Every survey that's done, the respondent is	2	variety of methods that Greenfield uses.
3	presented with an option, and that option	3	Now once we have that I felt
4	could be to complete that survey or not	4	necessity to do a stratified sampling to
5	complete the survey, so if the person, in	5	bring it back in line with demographic
6	fact, has completed the survey that we ask	6	variables, and from my experience I know
7	them to complete, then I guess you can say	7	such stratification has a very high
8	that that's volunteering, but we took again	8	probability of bringing things back in line
9	the methodology which you seem to be	9	to be representative.
10	slightly mischaracterizing is we randomly	10	Q. And every person who was included in your
11	sample for Greenfield. We then did a	11	627 respondents was paid by Greenfield
12	stratification. We then invited people. We	12	Online for participating in the survey,
13	sought these people out, and we invited them	13	isn't that correct?
14		14	A. As I have indicated in my survey, we gave
15	to complete our survey, so it's not fully	15	
16	volunteering.	16	people incentives. They were offered \$5 to
	Q. Doctor Hauser, the way these people were		complete the survey, and basically these
17 18	chosen by Greenfield Online in the first	17 18	incentives are just incentives to complete
	place was that these people volunteered to		the survey, and I found that there's no bias
19	participate not only in one survey, but in a	19	from past experience with using incentives.
20	series of surveys for Greenfield Online,	20	Some surveys will go quite a bit more
21	isn't that correct?	21	than \$5.
22	MR. GALLAGHER: Objection to the	22	Q. There was also, in addition to \$5 payment,
23	form. Asked and answered.	23	to every person there was also a sweepstakes
24	A. You know, you're using the word, volunteer,	24	in which participants could obtain something
25	here. Now volunteer, if you'd like to	25	more valuable than \$5, is that correct?
	Page 459		Page 46
1	define what you mean, do you mean the	1	A. Yes, there was a sweepstakes, although the
2	procedure by which Greenfield used? Now	2	suspected value of that sweepstakes is, to
3	it's not that these people are saying Gee, I	3	the best of my knowledge, less than \$5.
4	want to take your surveys, and they're not	4	Q. Doctor, let me hand you what I'll have
5	coming out of the blue.	5	marked for identification as Exhibit 23.
6	Greenfield is doing a various set	6	(Screening Statistics
7	of things, set of activities to recruit	7	marked Exhibit Number 23.)
8	people to join their panels and everyone is	8	Q. Doctor, here is Exhibit 23. Marked for
9	given the option of being in that panel, and	9	identification purposes. It's a copy of
. –	that same thing is true with Knowledge	10	your Screening Statistics.

I think it might have been this which is Exhibit 20. Q. Yes. A. And I looked at that and I said, Well, we have one variable; let's at least check to see if that variable affects anything. Q. In fact, when you say materials that I had been provided, you're referring to the materials that AMS had provided to defendants in this case, is that correct? A. These are materials that AMS had provided. Q. These are materials how long did AMS have these materials? When did AMS receive these materials? A. I do not know how long AMS had these
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	whether a professional survey taker would be at all different with respect to the variables of interest relative to anybody else. Q. We were provided with a calculation that I gather you did to determine whether people who might be characterized as professional survey takers answered the questions on this survey differently than people who had taken fewer than 30 surveys. Are you familiar with that calculation? Do you recall having made that calculation? A. Well, you've put a predicate in that, and I don't accept a predicate. Q. Did you make a calculation comparing the responses of people who had completed more than 30 surveys with Greenfield and those	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	 Q. How did that information become available to you? A. I was looking through the documents that you had been provided and saw compilation, something I don't know. I think it might have been this which is Exhibit 20. Q. Yes. A. And I looked at that and I said, Well, we have one variable; let's at least check to see if that variable affects anything. Q. In fact, when you say materials that I had been provided, you're referring to the materials that AMS had provided to defendants in this case, is that correct? A. These are materials that AMS had provided. Q. These are materials? When did AMS receive these materials?

38 (Pages 474 to 477)

	580	511		_
	Page 482		Page 484	1
1	your expert report from last August. Let me	1	Q. Well, would it be correct for me to conclude	
2	ask you to turn to paragraph ten. In	2	from your statement here on paragraph ten	
3	paragraph ten you conclude that "Health	3	that you've determined that 90 percent of	
4	risks are a positive contributing factor in	4	light cigarette consumers would not have	
5	the choice of light cigarettes for 90.1	5	purchased lights if they had perceived	
6	percent of light cigarette consumers." Do	6	lights to have the same health risks as	
7	you see that?	7	regular cigarettes?	
8	A. Just a second. I'm changing my glasses.	8	A. No. There's other things that can go into	
9	Okay, page ten. What paragraph again?	9	that.	
10	Q. Paragraph ten?	10	Q. What are those other things?	
11	A. Paragraph ten.	11	A. Well, there's other attributes to be	
12	Q. Paragraph ten.	12	measured and whether or not they're	
13	A. I'm sorry. I'm on page ten.	13	sufficiently different.	
14	Q. Page five, paragraph ten, and in that	14	Q. For example, what are those other attributes	
15	paragraph you state that you conclude that	15	that have to be measured?	
16	"Health risks are a positive contributing	16	A. Taste, pack size.	
17	factor in the choice of light cigarettes for	17	Q. Now why do I have to	
18	90.1 percent of light cigarette consumers."	18	A. Price.	
19	Do you see that?	19	MR. GALLAGHER: He's not done. Go	
20	A. Yes, I see that.	20	ahead. Taste, pack size and	
21	Q. What do you mean by "positive contributing	21	A. Taste, pack size and price.	
22	factor?"	22	Q. Why would I have to measure taste to	
23	A. What I mean by positive contributing factor	23	determine whether 90 percent or 90.1 percent	
24	is if consumers are given the choice between	24	of light cigarette smokers would not have	
25	cigarettes that vary in price and vary in	25	purchased light cigarettes if they had	
	Page 483		Page 485	5
1	health risk and possibly taste and pack	1	perceived lights to have the same risks as	
2	size, that the coefficient partworth of	2	regular cigarettes?	
3	health risk will be positive, that is a	3	MR. GALLAGHER: Objection to form.	
4	compensatory attribute and trading off	4	A. Well, as I mentioned before the conjoint	
5	health risk versus those other attributes.	5	analysis to which you're referring to this	
6	Q. Now do you mean by that that have you	6	90 percent comes from is an analysis of	
7	determined that 90 percent of light	7	these four attributes, and you're taking	
8	cigarette smokers strike that. New	8	just one of those attributes.	
9	question. Does that 90.1 percent mean	9	I've indicated that there are other	
10	that figure that you have in paragraph ten,	10	things that can compensate for health risk	
11	does that mean that 90 percent or	11	so if you give me two completely specified	
12	90.1 percent of light cigarette smokers	12	profiles, then I can give you an answer to	
13	would not have purchased light cigarettes if	13	that question, and you're only giving me	
14	they had perceived the risks of lights to be	14	you're only specifying one attribute in that	
15	the same as the risks of regular cigarettes?	15	profile.	
16	MR. GALLAGHER: Objection.	16	Q. How do you determine the percentage of light	
17	A. That's you've basically changed a context	17	cigarette smokers who would not have	
18	here and you've essentially changed from	18	purchased light cigarettes if they had	
19	preferences to perceptions, and without	19	perceived lights to have the same risks as	
20	further details on your question, I can't	20	regular cigarettes?	
21	answer that, so if you provide me with more	21	MR. GALLAGHER: Objection to the	
22	details I can answer your question.	22	form.	
23	Q. Like what details?	23	A. The data that I have coupled with other data	
24 25	A. Well, restate the question and I'll give you those details.	24 25	can be used by other experts such as Doctor Harris should he choose to do so to answer	
	TROUG COTOLIC		Harrie chauld he chance to do co to anciver	

40 (Pages 482 to 485)

	580	512		
	Page 486		Page 48	88
1	questions such as that.	1	market full market equilibrium analysis.	
2	Q. Have you answered that question?	2	I have not done a full market equilibrium	
3	A. I am not providing a damages opinion in this	3	analysis in this case although the data that	
4	case. I can talk about what the data means	4	I provided may be used in such analysis.	
5	from the survey, and I can give you	5	Q. Can I ask you to turn to page 16 of your	
6		6		
7	interpretations of that data, and that's	7	expert report, footnote 21. Would it be a	
	what I'm here to do today.		correct interpretation of this footnote to	
8	Q. I'm not sure, just as background, what is a	8	conclude from it that you found that	
9	damage question and what is not, so let me	9	A. Might be simpler if I read it first and then	
10	ask again the actual question of whether you	10	listen to your question.	
11	have done an estimate, done a calculation on	11	Q. Fine, please.	
12	the percentage of light cigarette smokers	12	MR. GALLAGHER: Footnote 21?	
13	who would not have purchased lights if they	13	MR. GARNICK: Footnote 21.	
14	had perceived the risks of lights to be the	14	MR. GALLAGHER: Okay, thanks.	
15	same as the risks of regular cigarettes?	15	A. Okay, now you can ask the question. I just	
16	MR. GALLAGHER: Objection. Asked	16	wanted to make sure which ways the numbers	
17	and answered.	17	are going and things like that. Yes.	
18	A. I have provided a market simulation in this	18	Q. On average were the partworths greater for	
19	paper I'm sorry expert report and	19	soft pack or hard pack?	
20	that's the market simulation upon which I'm	20	A. Like to look at the exhibit to be sure, but	
21	providing an expert opinion. In doing that	21	based upon this footnote it appears that it	
22	I seem to recall we may have done a little	22	was higher for soft pack versus hard pack.	
23	bit of sensitivity analysis. I don't recall	23	Q. Do you know whether, in the market, the	
24	all of those, but beyond that I've not done	24	majority of light cigarette smokers prefer	
25	a lot of market simulations, particularly	25	soft pack or hard pack?	_
	Page 487		Page 48	89
1	using price and tastes and other data from	1	A. This is indicative of preference not	
2	the marketplace as it exists, and those	2	conditioned upon all the other attributes.	
3	market simulations would be what would be	3	Q. I'm sorry. Was that a yes, you know, or no,	
4	required to answer the question that you're	4	you don't know?	
5	posing which is an incomplete question with	5	A. Well, this is indicative of the fact that on	
6	respect to the conjoint analysis.	6	average the partworth of soft pack is higher	
7	Q. Have you offered an opinion as to a specific	7	than the partworth of hard pack.	
8	percentage of light cigarette smokers who		Q. Do you know whether, in the real market, the	
9	would not have purchased light cigarettes if	9	majority of light cigarette smokers prefer	
10	they had perceived the risks of lights to be	10	hard pack or soft pack?	
11	the same as regular cigarettes?	11	A. I don't want to pick on bones, but what do	
12	A. I have data that I've provided can be	12	you mean by prefer? Do you mean that all	
13	used to run that analysis with other data.	13	else equal, do they prefer soft versus hard	
14	I have not particularly run that analysis	14	pack?	
15	yet; however, should I be provided that	15	Q. Right.	
16	data, I certainly would be able to run those	16	A. This would be indicating that all else	
17	analysis.	17	equal, it's soft. On average the partworth	
18	Q. Have you been asked in this case to estimate	18	is bigger. Now this is the average	
19	what the market price would be if lights had	19	partworth is bigger. Does not say that the	
20	always been perceived by consumers to be	20	majority of people prefer soft versus hard	
1.11	armays been perceived by consumers to be		pack, and we've gone through that before,	
	iust as risky as regular cigarettes?	/.		
21	just as risky as regular cigarettes? MR. GALLAGHER: Objection to the	21		<u> </u>
21 22	MR. GALLAGHER: Objection to the	22	the difference between averages and numbers	
21 22 23	MR. GALLAGHER: Objection to the form.	22 23	the difference between averages and numbers of people. Median is reflective of numbers	
21 22	MR. GALLAGHER: Objection to the	22	the difference between averages and numbers	

41 (Pages 486 to 489)

	J01	<u>013</u>		
	Page 502		Page	504
1	the case. Again, there were percentages and	1	Q. Is the 90.1 percent, that doesn't represent	
2	we looked at the percentages, but I can't	2	the people who have a positive partworth	
3	remember all the details. Now I think if	3	comparing the partworths for health for	
4	you'd like we can go to the actual	4	light cigarettes and the partworth for	
5	description of that calculation which is in	5	health for regular cigarettes, correct?	
6	the report.	6	A. What the 90.1 percent it says	
7	Q. Well, I'm satisfied with your answer unless	7	90.1 percent of the people care about health	
8	you feel you need to go through it. Let me	8	and are willing to trade off health risks	
9	just ask another question.	9	versus other aspects in the marketplace. So	
10	A. Let me just make sure I answered it	10	over this range they have a positive	
11	correctly. I think we had it on page 22 or	11	valuation of health, and the range, I'm very	
12	something? It's getting late in the day and	12	comfortable with the differences there.	
13	I want to make sure I answer positive	13	Q. So the 90.1 percent is not the percentage of	
14	value on health risk. I can't find it in	14	light smokers who perceive that lights are	
15	the report, but as I recall importances were	15	less unhealthy than regulars, correct?	
16	basically the difference between the maximum	16	A. That's a different number that we've spoken	
17	and the min. We've gone over that earlier	17	about before.	
18	in the deposition.	18	Q. Okay.	
19	Q. Okay. Now if I wanted to know for what	19	A. This 90.1 percent is the people that place a	
20	percentage of light cigarette smokers, the	20	positive value on health and are willing to	
21	difference or the net of value of	21	trade off health versus other aspects.	
22	partworths strike that. If I wanted to	22	Q. Now you talk about ranking the attributes in	
23	compare not the greatest if I wanted to	23	your expert report, correct?	
24	compare not the extremes of partworth, that	24	A. Yes.	
25	is, greater than regulars and less than	25	Q. And in ranking the attributes, you look at	
	Page 503		Page	505
1	ultras if I just wanted to compare the	1	the differences between partworths between	
2	partworths attached to the risks of light	2	two extremes, is that fair to say?	
3	and the risks of regulars, how would I do	3	A. Yes, and that's so I think we've gone	
4	that?	4	over that before, and that was the paragraph	
5	A. Well, okay, first is the partworths as they	5	I was trying to find. If someone can help	
6	perceive it.	6	me find that paragraph, we can be very exact	
7	Q. Right.	7	as to the definitions.	
8	A. So the partworths of their perceptions of	8	Q. Now if we wanted to rank the attributes only	
9	light versus the partworths of, say, their	9	with respect to light and regular	
10	perceptions of ultra lights. If you want to	10	cigarettes, we could get a different	
11	compare lights versus ultra lights.	11	ranking, couldn't we?	
12	Q. How about lights versus regulars?	12	MR. GALLAGHER: Objection to the	
13	A. So you'd like to compare lights versus	13	form.	
14	regulars, so we'd like to compare lights	14	A. Well, what I've done is I've provided the	
15	versus regulars for each and every	15	ranking of partworths with respect to the	
16	respondent recognizing that for some of the	16	max versus the min. I have not completed	
17	people they perceive that the health risks	17	the analysis. It's another analysis that	
18	of lights are less than regulars and some of	18	can be done. It might make a health risk	
19	the people, as you've indicated, may have a	19	more. It might make a health risk the same,	
20	different perception.	20	etcetera and it's something that certainly	
21	We have provided I'm pretty sure	21	is doable.	
22	in the documents, the posterior means, for	22	Q. If, over 37 percent of the respondents who	
23	every respondent on all these partworths.	23	took the conjoint study believed that lights	
24	Q. So they can be calculated?	24	were as risky or more risky than regular	
25	A. Yes. They can be calculated.	25	cigarettes, that would likely affect the	
24	Q. So they can be calculated?	24	were as risky or more risky than regular	

45 (Pages 502 to 505)

	580	·	
	Page 506		Page 508
1	ranking if one restricted the ranking only	1	believed that lights were as risky or more
2	to comparing light cigarettes and regular	2	risky than regular cigarettes, correct?
3	cigarettes, is that fair?	3	A. Okay. Remember that these respondents
4	MR. GALLAGHER: Objection to the	4	perceived this at the time of the survey, so
5	form. Go ahead.	5	I don't know what their perceptions were
6	A. Okay. You know, here we are actually	6	prior, you know, maybe a year or two prior
7	getting into some of the technical data in	7	to the survey, so with that caveat, we have
8	the HB hierarchical Bayes in the	8	two different measures.
9	mark-off chain analyses. Certainly as we	9	One is their measures of the
10	change the inputs in the questions we ask,	10	perceptions of light versus regular
11	those are questions that can be answered.	11	cigarettes with respect to health risks and
12	Now I have not, sitting here today, run	12	we're finding that yes, approximately 60
13	those particular numbers, so those are	13	some odd percentage of people feel that
14	numbers that can be run, and I know you've	14	light cigarettes are less unhealthy than
15	been provided with the posterior means so	15	regular cigarettes, and then we have another
16	you can run those numbers.	16	statement which is related to it, but it's
17	If I'm asked that question by	17	not the same statement and that's that
18	either you or counsel and I'm asked to look	18	roughly 90 percent of the people place some
19	into that, I have the means of answering	19	positive value on health risks and are
20	that question, but I don't know the answer	20	willing to trade things off with respect to
21	to that question without doing those	21	health risk.
22	analyses	22	Q. But the two statements are not the same,
23	Q. And again just to be clear, when you said	23	correct?
24	that approximately 18 percent of the	24	A. That's what I've just testified. I've
25	respondents ranked health risks at the very	25	testified that you have to interpret these
	Page 507		Page 509
1	top, that was referring to the result from	1	as to what they're actually saying and that
2	looking at the two extremes, greater than	2	these are two of the many data points or
3	the health risks greater than regular	3	analyses in the report that lead me to the
4	cigarettes and health risks less than an	4	conclusion that the vast majority of these
5	ultra-light.		
6	and ingite.	5	consumers care about health risks.
	A. Yes, and I'd like to put that in context, if	5 6	
7	A. Yes, and I'd like to put that in context, if I may.	6 7	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second
8	A. Yes, and I'd like to put that in context, if I may.Q. Go ahead.	6	consumers care about health risks. Q. Let me direct your attention to paragraph
8 9	A. Yes, and I'd like to put that in context, if I may.Q. Go ahead.A. That there are a large number of percentages	6 7 8 9	consumers care about health risks. Q. 8 9 10	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent 	6 7 8 9	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether"
8 9 10 11	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think 	6 7 8 9 10 11	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you.
8 9 10 11 12	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but 	6 7 8 9 10 11 12	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please.
8 9 10 11 12 13	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a 	6 7 8 9 10 11 12 13	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry,
8 9 10 11 12 13 14	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is 	6 7 8 9 10 11 12 13	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine?
8 9 10 11 12 13 14 15	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is pretty important to these respondents, and 	6 7 8 9 10 11 12 13 14 15	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine? THE WITNESS: I'm sorry, I keep
8 9 10 11 12 13 14 15 16	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is pretty important to these respondents, and it's really the health risks are very 	6 7 8 9 10 11 12 13 14 15 16	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine? THE WITNESS: I'm sorry, I keep going to the page. Paragraph nine, page
8 9 10 11 12 13 14 15 16 17	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is pretty important to these respondents, and it's really the health risks are very important to these respondents as a whole 	6 7 8 9 10 11 12 13 14 15 16 17	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine? THE WITNESS: I'm sorry, I keep going to the page. Paragraph nine, page five, okay. I'm sorry for
8 9 10 11 12 13 14 15 16 17 18	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is pretty important to these respondents, and it's really the health risks are very important to these respondents as a whole and the vast majority of these, and so we're 	6 7 8 9 10 11 12 13 14 15 16 17 18	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine? THE WITNESS: I'm sorry, I keep going to the page. Paragraph nine, page five, okay. I'm sorry for Q. Second sentence.
8 9 10 11 12 13 14 15 16 17 18	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is pretty important to these respondents, and it's really the health risks are very important to these respondents as a whole and the vast majority of these, and so we're taking single numbers, and all these numbers 	6 7 8 9 10 11 12 13 14 15 16 17 18	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine? THE WITNESS: I'm sorry, I keep going to the page. Paragraph nine, page five, okay. I'm sorry for Q. Second sentence. A. Second sentence.
8 9 10 11 12 13 14 15 16 17 18 19 20	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is pretty important to these respondents, and it's really the health risks are very important to these respondents as a whole and the vast majority of these, and so we're taking single numbers, and all these numbers are indicative of the overall opinion, and 	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine? THE WITNESS: I'm sorry, I keep going to the page. Paragraph nine, page five, okay. I'm sorry for Q. Second sentence. A. Second sentence. Q. "The results can be relied upon to draw
8 9 10 11 12 13 14 15 16 17 18 19 20 21	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. That there are a large number of percentages in the report which are basically consistent and the 18 percent is one of them. I think it was 57 percent which ranked second, but basically taking all those analysis as a whole it's pretty clear that health is pretty important to these respondents, and it's really the health risks are very important to these respondents as a whole and the vast majority of these, and so we're taking single numbers, and all these numbers are indicative of the overall opinion, and the overall opinion, as summarized, is that 	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	consumers care about health risks. Q. Let me direct your attention to paragraph nine of your expert report, the second sentence. It says, "The results can be relied upon to draw inferences about whether" A. Could I catch up? Thank you. Q. Please. MR. GALLAGHER: I'm sorry, paragraph nine, page nine? THE WITNESS: I'm sorry, I keep going to the page. Paragraph nine, page five, okay. I'm sorry for Q. Second sentence. A. Second sentence. Q. "The results can be relied upon to draw inferences about whether health risks are a
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	 A. Yes, and I'd like to put that in context, if I may. Q. Go ahead. A. 1	extremes. Certainly the consumer, as we	1	more health risks than regular cigarettes,
2	found in the pre-tests, and as you've so far	2	correct?
3	indicated, many people have stated and I	3	MR. GALLAGHER: Objection to the
4	think we've gone to that number. It's sort	4	form.
5	of 38 percent or whatever, did say that	5	A. Well, as I didn't know that. It's
6	cigarettes were that the health risk of	6	reasonable to assume but, in fact, this
7	regular cigarettes were, in their own	7	would you might say that I'm bending over
8	perception at the time of the survey,	8	backwards to make sure that this question is
9	the same as the health risks of light	9	two-sided in its nature and it's not leading
10	cigarettes, so this is a two-sided	10	them one way or the other.
11	question. It was pre-tested. It appears	11	What you're implying is that there
12	to be accurate, and people are responding	12	might be a demand artifact to have them
13	with the answer that you're implying that	13	that, in fact, this 37 percent that we're
14	they would not respond with, so I'm very	14	having that we've been talking about is too
15	comfortable with the statement of this	15	high a number, and it should be less than
16	question.	16	that. Now, that's what you're implying. I
17	Q. Did you provide, as an example, that they	17	don't believe that. I believe that the
18	might believe that smoking light cigarettes	18	numbers in the survey are accurate to the
19	provides the same health risks as regular	19	best of our ability and subject to response
20	cigarettes?	20	errors, etcetera, but I do not believe that
21	MR. GALLAGHER: Objection to the	21	this statement, in the first paragraph on
22	form.	22	page E15, is causing any bias one way or the
23	A. You know, the direction you're going you're	23	other.
24	going to say, you know, I should have been	24	Q. If the great majority of people taking this
25	saying 50 percent more, 20 percent more,	25	survey, if it's reasonable to assume that
	Page 535		Page 537
		1	
1	etcetera. I have provided a two-sided	1	the great majority of the people taking this
2	question. The two-sided question gives the	2	survey would not think that lights are more
3	high level; it gives the low level and by	3	risky than regular cigarettes, doesn't this
4	implication gives the middle level, and	4	first paragraph suggest to them that smoking
5	that's the way the respondents understood it	5	light cigarettes provides less risk than
6	at least to the best of my recollection.	6 7	smoking regular cigarettes?
7	Q. Did you list, as an example, that light		MR. GALLAGHER: Objection to the
8	cigarettes might present the same health	8	form.
10	risks as regular cigarettes?	9	A. First you said more. Then you said less.
11	A. In this particular statement we list more	$\begin{vmatrix} 10 \\ 11 \end{vmatrix}$	I'm not sure seems to be a confusing question here. I mean
12	health risk, less health risk. We do not	12	question nere. I mean MR. GALLAGHER: Hold on. Let him
13	explicitly list equal health risk although	13	restate the question.
14	that's implicit in the two-sided statement. MR. GALLAGHER: I just want to be	14	Q. You said that it was reasonable to assume
15	clear. You're talking about just in the	15	that at least the majority of participants
16	first paragraph or in the entire screen	16	taking the survey would not believe that
17	shot?	17	smoking light cigarettes would be more risky
18	A. My answer is with respect to just a single	18	than smoking regular cigarettes.
19	paragraph.	19	A. I did not say that, but go on.
20	MR. GARNICK: Just state your	20	Q. The record will be clear.
21	objection.	21	A. The record was saying that I did not have
22	MR. GALLAGHER: I did.	22	that preconceived notion. It might be
23	Q. You knew going in, before you conducted this	23	reasonable to assume that.
24	survey, that very few of the respondents	24	Q. Okay. If that is true, it's reasonable to
	Some to the minut to the test of the respondents		Z. Chaj. Il diac is diac, it is icusoffacto to
25	would believe that light cigarettes provide	25	assume that the majority of people would not
